Description

Lume Consulting Group is seeking a Senior Application Developer with minimum 3 years' experience in developing, troubleshooting, and maintaining solutions using PowerBuilder 12.5 or higher, Appeon PowerBuilder 2019, and Oracle 11g. Superior troubleshooting skills on server and application layers are desired. Knowledge and experiences in integrating PowerBuilder 12.5 source code to run on Windows 10 and Office 365 are desirable.

Responsibilities

Responsibilities include but are not limited to:

- Maintain and support the application environment
- Define and document business requirements for existing applications
- Develop and test new modules for existing applications
- Participate in code walkthroughs to ensure the program meets the business requirements and follows the coding standards
- Provide documentation to support the applications
- Maintain change control
- Develop and execute comprehensive test plans
- Perform complete regression testing
- Analyze and resolve functional and operational problems identified by the end users

Client's Current Environment:

Desktop Workstations:
Windows 10, Windows 7

LAN Servers:
Windows Server 2003 and 2008 (two-node clustered environment)

Network Protocols:
TCP/IP

Application Development:
