

Senior Microsoft 365/Azure Lead

Responsibilities

This individual will serve as the **senior technical lead** and advisor for **Microsoft 365, Azure, Entra ID, Microsoft Copilot, Exchange Online, Microsoft security and compliance solutions**, and related cloud services. The role combines strategic architecture and governance advisory responsibilities with hands-on tenant administration, configuration, troubleshooting, monitoring, and operational support.

The ideal candidate is a **senior Microsoft cloud professional** who can provide architectural direction while also resolving complex technical, identity, security, compliance, and platform-administration issues

Qualifications

Minimum Qualifications

- 8 or more years of experience supporting Microsoft infrastructure, cloud, or enterprise collaboration environments.
- At least 5 years of recent experience administering Microsoft 365 tenants.
- At least 5 years of experience with Azure and Entra ID, including identity and access management, conditional access, and application registrations.
- At least 5 years of experience configuring and supporting Microsoft 365 security and compliance capabilities.
- 5 years experience with Exchange Online, SharePoint Online, Microsoft Teams, and OneDrive.
- 5 years experience designing Microsoft 365 and Azure tenant or solution architectures.
- 5 years establishing or supporting governance frameworks for Microsoft 365 and Power Platform.
- 5 years hands-on experience with Microsoft Purview, Microsoft Defender, data loss prevention, information protection, audit, and logging.
- 5 years experience troubleshooting complex Microsoft 365, Azure, security, identity, and integration issues.
- Minimum 8 years technical documentation, communication, presentation, and stakeholder-management skills.
- 5 years experience with Azure Functions, Logic Apps, Azure SQL, Azure Storage, and API Management.
- 5 years advanced PowerShell scripting and Microsoft cloud automation experience.
- 5 years experience with SharePoint hybrid or legacy SharePoint environments.
- Relevant certifications in Microsoft 365, Azure, identity, security, compliance, or solution architecture.
