Senior Software Engineer REMOTE Posted 5/5

Description

The **Senior Software Engineer** will play a critical role in guiding these activities, ensuring technical feasibility, system integration readiness, and successful transition into implementation.

Responsibilities

Senior Software Engineer

Leads technical analysis and software development tasks related to system integration, modernization, and data synchronization. This includes developing and validating solution-level code components, ensuring adherence to software life cycle standards, participating in design reviews, and delivering quality-tested code aligned with documented requirements. Must be experienced in working across large, legacy and modern systems.

Qualifications

- Bachelor's degree – Master's preferred
- 5 years of experience in lead capacity in electronic data processing systems study, design, and programming – 7 years preferred
- 5 years of experience identifying and developing solutions by analyzing systems flow, data usage, business processes, investigating issues and problems, conducting systems analysis, designing system specifications, and developing documentation – 7 years preferred
- 3 years of experience in Oracle database development, with a strong focus on SQL and PL/SQL – 5 years preferred
- 5 years of experience in programming languages for data manipulation and integration (e.g., PL/SQL, Python, Java) – 7 years preferred
