Senior Software Engineer

Description

Lume Consulting Group a Sacramento based IT consulting company is looking for a qualified individual to fill the role of a Senior Software Engineer

Qualifications

Mandatory Qualification

- Minimum of seven (7) years of experience in electronic data processing systems study, design, and programming. At least four (4) years of that experience must have been in a lead capacity.
- Possession of a bachelor's degree in an IT-related or Engineering field. Additional qualifying experience may be substituted for the required education on a year-for-year basis.

Desirable Qualifications

Four (4) years of Senior Software Engineer experience performing the following tasks:

- Reviewing application remediation plans and collaborating with other technical resources to understand system changes and potential impacts.
- Developing test plans and test cases for application changes, component updates, security remediation, and application operation in new environments.
- Experience using Azure DevOps to document test cases, execute test cases, and document defects.
- Documenting test cases.
- Performing test functions to validate application operations in new environments.
- Developing UAT plans and validate them with stakeholders.
- Leading technical and business staff through unit, integration, system, and User Acceptance Testing (UAT) testing activities.
- Executing test cases and documenting defects.
